Importance: High

Sorry about taking so long to back to everyone. (b) (6)

This e-mail confirms our meeting on Thursday January 19th from 130-330pm. I didn't get an indication of people's preference from a meeting place, so I've reserved Rm C here for the meeting. Hopefully this still works for everyone.

I'm not sure if we'll have time to flesh out the details of discussion topics, but here's the general agenda routed previously:

1. Review the site status,
2. Discuss the scope and objectives of "Draft Source Control Alternatives Evaluation Work Plan" (Work Plan) for the TCE contamination at the Siltronic facility,
3. Identify roadblocks, if any, to Siltronic's overall approach,
4. Clarify EPA and DEQ responsibilities, and
5. Coordinate review of the Work Plan.

Last Friday morning James Peale sent out an e-mail proposing meeting dates to discuss the Work Plan. I'll send him an e-mail letting him know that we'll be meeting to discuss the Work Plan and coordinate review, and that we'll be contacting him regarding a meeting date.

Thanks much for your time in arranging schedules, and we'll see you on the afternoon of the 19th.

Dana

RE: Siltronic, Draft Source
control Alternatives Work Plan
Review

Quick update on the Siltronic's meeting arrangements...late morning and afternoon of Thursday 1/19 work for everyone except for Kristine and possibly Eric.

If the 19th works for Eric, I suggest we confirm a meeting on 19th for 130-330pm

This is the first EPA/DEQ project coordination meeting I've arranged so I don't know how EPA's been covering meetings. I'm wondering if it will work for the EPA team if Chip and Eric brief Kristine on meeting discussions/outcome afterwards.

If this isn't preferable, other alternative dates/times that have been proposed are Monday 1/23 in

the morning, or anytime one Wednesday the 25th.

We'll wait to hear from Eric and EPA on whether the 19th can work before trying for other dates/times.

Thanks again for your time coordinating schedules.

Review

Good morning.

Regarding my e-mail sent last Friday, Jim Anderson let me know you two were going to be in Portland Harbor meetings on the days proposed (i.e., afternoon of Tuesday January 17th or sometime Wednesday the 18th).

How about sometime the 19th or 20th?

If not could you send some dates/times that work for you and we can go from there. Hopefully you have a couple of hours before the end of the month.

Thanks much and hope you had a good weekend.

Subject: Siltronic, Draft Source control Alternatives Work Plan Review

In a meeting last November, Siltronic let us know of their plans to expedite source control evaluations and measures implementation to address TCE contamination in, or migrating into the Willamette River. Yesterday DEQ received the hard copy of Siltronic's draft Source control Alternatives Work Plan (the Work Plan).

The Work Plan is the first major submittal from Siltronic that DEQ has received since our project team was reorganized. I also understand that this is the first project document that EPA will be reviewing and commenting on for this project.

Regarding DEQ's project team, given Matt's expanded Portland Harbor role and Rod's departure, the team now includes Heidi Blischke (hydrogeologist/technical peer), Tom Gainer (engineer), and me (project manager). I'm DEQ's principal point of contact for Siltronic and EPA on the project as well.

Siltronic has requested EPA and DEQ to jointly review the document so that our comments can be discussed during a meeting late this month or early next month. Siltronic's goal is to finalize the Work Plan with EPA/DEQ joint approval by the end of February 2006.

I'm not sure Siltronic's proposed timeline is realistic given people's schedules and workloads, but I'd like to accommodate them in moving the project forward as quickly as practicable.

I propose meeting in the afternoon on Tuesday January 17th or sometime the 18th to:
Review the site status,
Discuss the scope and objectives of source control for the TCE contamination,
Identify roadblocks, if any, to Siltronic's overall approach,
Clarify EPA and DEQ responsibilities, and
Coordinate review of the Work Plan.

If you could let me know if the meeting date and time work, and whether you think Siltronic's proposed timeline is realistic I'd appreciate it.

Thanks in advance for responding to this e-mail and hope everyone has a good weekend.
